UNDERSTANDING YOUR HEALTH RECORD/INFORMATION

Each time you visit a hospital, physician, or other healthcare provider, a record of your visit is made. Typically, this record contains your symptoms, examination and test results, diagnoses, treatment, and a plan for future care or treatment. This information, often referred to as your health or medical record, serves as a:

- basis for planning your care and treatment
- means of communication among the many health professionals who contribute to your care
- legal document describing the care you received
- means by which you or a third-party payer can verify that services billed were actually provided
- a tool in educating health professionals
